

# MANUFACTURING

## FACILITY MANAGER ○

These positions work with ownership and the master extractor to help manage production timelines, employee schedules and budgetary concerns. They also oversee and maintain the laboratory facility's safety guidelines and standard operating procedures in accordance with local regulations.

## ○ EXTRACTION TECH

This position manages responsibilities set by the facility's lead extractor and helps manage the equipment and execute operations on a day-to-day basis. They also help manage facility inventory and ensure laboratories are kept safe and clean.

## QUALITY MANAGER ○

In-house quality managers oversee the testing of the products and uphold quality standards to make sure these products are safe for consumption. They often oversee the testing and processing methods and establish procedures to prevent the product from becoming comprised in the production process.

## ○ EDIBLES CHEF

Professionals with a culinary background who are in charge of planning and executing the production of edibles or infused beverages with the extracted cannabis components.

## PACKAGER ○

Another common entry-level job in the industry, these positions help with the packaging of CPG products ahead of distribution and sale. Their responsibilities can include managing the packaging automation technology or manually handling the packing process in a safe and efficient manner.

\*\*\*All persons allowed to work if they are 21+ years of age, obtained an Agent Card from the Nevada Cannabis Compliance Board (CCB), and had a background check. Current law states an employee cannot have been convicted of an excluded felony offense. Additional experience and education level is required based on position.
